Supported by the UK
Neuroinformatics Node, the
Neuroscience Research Institute
and the Faculty of Life Sciences

Professor Peter Dayan, UCL

Dr Christoph Kayser, Max Planck Institute, Tuebingen

Dr Miguel Maravall, Instituto de Neurociencias, Alicante

Dr Simon Schultz, Imperial College London

Prof Simon Thorpe, CNRS, France

Prof Misha Tsodyks, Weizmann Institute of Science, Rehovot, Israel

Understanding how the brain codes and processes information is one of the major challenges of neuroscience. The Manchester Neural Coding and Computation Workshop will address this fundamental problem by bringing together leading international speakers from computational neuroscience, mathematical neuroscience and systems neuroscience.

The aim of the workshop is to present cutting edge research on neural coding from a multidisciplinary perspective.
